

Finding Slope Puzzle

Cut out cards on pages 2-7. Page 8 shows what the final product should look like. Cards 2-7 can be printed out as they are to create a group-sized puzzle. If printed 2 to a page, they are more of a personal puzzle.

This puzzle can be used as a cooperative learning activity for a group of students, a personal puzzle at a math center or station, a practice puzzle glued in an interactive notebook, or as a continuous practice puzzle stored in an envelope or a baggie in an interactive notebook.
