

Name _____ Period _____

Standard to Slope-Intercept

Convert each Standard form equation into Slope-Intercept and state the y-intercept.

$10x + 2y = 10$	$3x + y = 1$	$2x - 5y = 13$
$-3x - 3y = 12$	$4x - 10y = -3$	$3x + 12y = -5$
$10x + 15y = 11$	$8x + 16y = -6$	$5x - 8y = -4$
$4x + 12y = -6$	$10x + 9y = 10$	$-2x - 8y = 3$
$2x + 13y = -4$	$-3x + 5y = -5$	$4x + 3y = 11$
